

Emergency hand pumps for mini power packs

**Emergency hand pump mounted
on power pack POWER PRO type**

**Emergency hand pump mounted
on power pack PK type**

New emergency hand pump with mounting panel (cod. 149-011-00708).

A new emergency hand pump version is now available. It can be applied both on mini power packs PK-STD type and power packs of new generation POWER-PRO type.

The mounting of hand pump on the panel instead of the tank allows the use also with the latest type of POWER-PRO power packs provided with plastic made tank.

The body of the pump in anodised aluminium and the stem is nickel-treated.
The operation with simple effect allows a flow of 16cc/cycle.

The article number includes the operating lever of 32cm of length and it should be added to the mini power pack while placing the purchase order.

It is advisable to use the emergency hand pump only in configuration with one or two electric valves.
