

## Cable controls series LINEA

Cable controls series "linea" have been renovated in order to make the lever box aesthetically more suitable for nowadays cabins. overall dimensions and fixing pattern have not been changed, as well as rubber cables and different possible configurations. the box is now made of technical nylon which is highly strong and enables a good sliding of the moving components. it also reduces the unpleasant vibrations coming from the gearbox . the new lever box will be introduced into all cable versions starting from next deliveries and part numbers will remain the same.
