

NEW OIL TANK MOUNTING BRACKETS

We have introduced a new hole pattern on our mounting brackets for oil tanks in order to cover the different distance between the holes across the various chassis available on the market. Thanks to this new layout it is now easier to fix the brackets to the chassis and it is possible, in some case, to use up to 3 fixing holes each bracket.

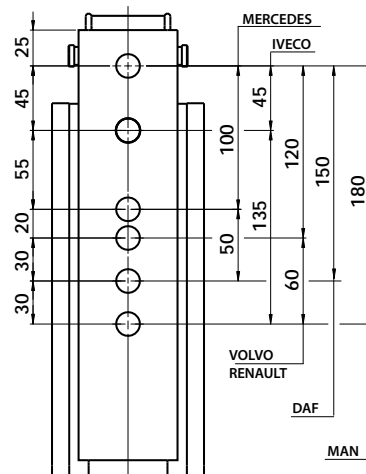

OLD Mounting kit 135-903-00011

NEW Mounting kit 135-903-00020

HOLES PATTERN FOR VARIOUS TRUCK BRANDS

Now it is also possible to order oil tank and mounting kit separately for your convenience.

Oil tank c/w
mounting kit
