

# Power... Pro WL

The radio controlled OMFB Mini Power Pack

## The new remote controlled power pack for tip trucks

THE REMOTE CONTROL OPERATES:

- POWER ON
- TIP LIFTING UP
- TIP LOWERING

THE RECEIVER SENDS INFOS SUCH AS:

- CONNECTED STATUS
- TIP UP STATUS
- FIXED STARTER SWITCH STATUS
- EMERGENCY STATUS

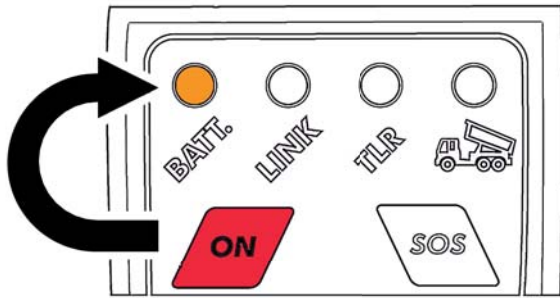

Power-Pro WL is a pre-wired power pack for tip trucks controlled by a wireless remote control and a diagnosis system. Simply connecting the cables to the battery the power pack is immediately operated.

The power pack is available either with 12V or 24V DC motor, either with 5 or 9 lt tank, either with 1 or 3,1 cc pump, either with or without pre-wired cables. The standard version includes a switch for excluding the battery, a pressure detector, an alarm signal, a control unit and its support panel.

## Power-Pro WL remote control unit:

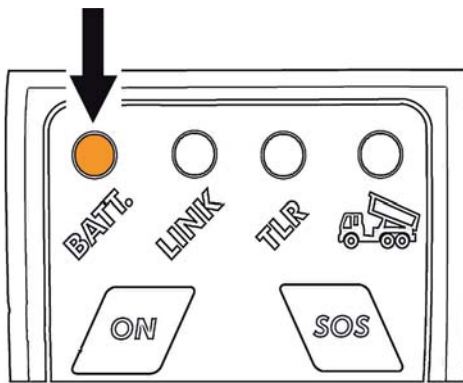

- ON/OFF switch

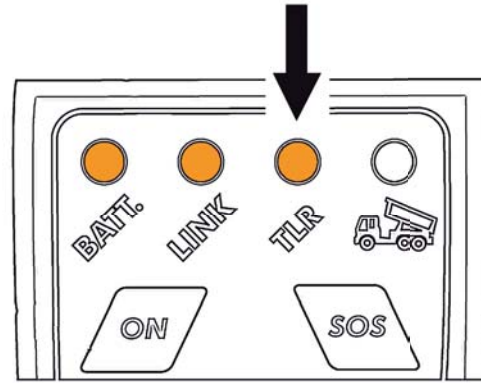

- Remote control for tip lifting up and lowering

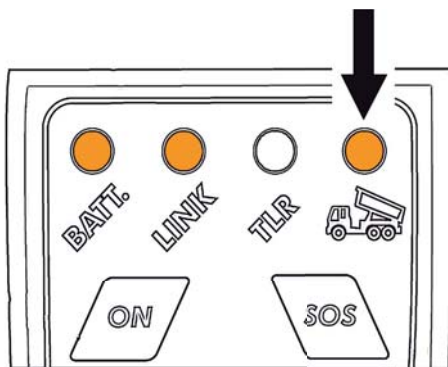

- Light signal for battery status on the remote control

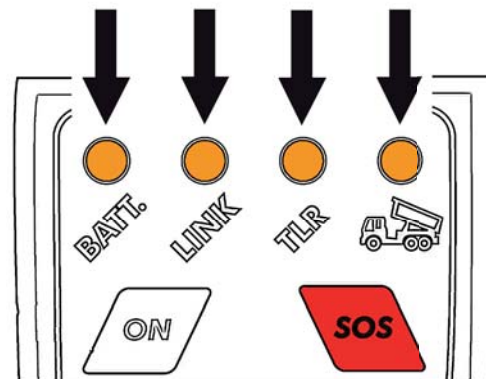

- Light signal for starter switch failure on the remote control

- Light signal for tip up status on the remote control

- SOS key to block all functions in case of failure

The wiring includes also an emergency system to operate the power pack in case of remote control with low battery or out of order.
